

General Election ExpressVote Voting Instructions

Ask the precinct election officials for assistance if you need help using the ExpressVote. You may change the text size and color by using the “Zoom In/Out” and “high contrast” buttons. You may also use headphones to hear the ballot read aloud. The ExpressVote allows you to control the volume and speed at which the ballot is read by using the “-” and “+” volume and tempo buttons on the keypad.

1. Insert the ballot in the ExpressVote with the corner cut in the upper right hand corner.

2. Mark your ballot.

Touch the oval or name next to your choice.

Each office title lists the number of candidates for which you may vote. Do not mark more ovals than that number. You may choose to vote for fewer candidates, or you may skip any race.

If you mark too many ovals in a race, the votes for that race cannot be counted. The other correctly marked races will be counted.

To change a vote, touch the oval or name again. This will cancel your choice, and then you may mark another choice.

You may override your straight party vote for any office by touching the oval(s) next to the name(s) of the candidate(s) for whom you wish to vote. Your straight party vote will not count for that race.

3. Review your ballot.

Review selections on the summary screen. If changes are needed, simply press the contest and be redirected to that contest. Once choices are confirmed, press PRINT and remove the voted card.

4. Cast your ballot.

Place your ballot in the secrecy folder and take it to the ballot scanner.

Insert your ballot into the ballot scanner.

If the ballot scanner rejects your ballot, notify a precinct election official.
